

Hello.

My name is Miryan [REDACTED] I am 24 years old. I live in [REDACTED] Ecuador. I grew up in [REDACTED] Ecuador. My childhood was very fun. I have six siblings, five nieces and one nephew, and my parents live in [REDACTED]

I have many memories of my childhood, such as.

I used to learn to swim in a river with my parents; during the weekends when my whole family went to the river.

I used to walk for an hour to go to school with my siblings. We didn't have school transportation.

I used to cook with my stepmother. She has been a good stepmother for me. She taught me how to prepare chocolate when I was ten years old, this was the first recipe I learned when I was 10 years old.

I love practicing sports, such as; swimming, running, soccer, and I would like to practice bungee jumping. I love extreme sports.

When I was fourteen years old, my first niece was born. I took care of her, I bathed her, and I fed her. I played with her while my sister worked. I went with my niece in the afternoon because I studied school in the morning.

After two years, my second niece was born and I also took care of her, she was two years old, so my first niece was four years old and the second was two years old.

I graduated school when I was 18 years old, and I went to work as a restaurant cashier for one year, and after one year I started working in a Financial Institution, two years later I traveled to [REDACTED] I started working in a

house with a family and two children. The first child was eight years old and the second child was one year old. This experience was very productive for my life, because I learned a lot of things about children of other people. My job was to play with them, help with homework with this family, and sometimes I cooked for them. I worked for two years.

When I was 23 years old, another family hired me who had two children, the first child was two years old and the second was nine years old. My responsibilities were to take the children to school, prepare their food, wash their clothes, and help with homework. Sometimes on the weekends the whole family went camping, and I went with them. While the parents were talking with their children, I was driving. It was very fun. I worked eight months with this family.

Nowadays, I'm working in a hair salon, and all weekend I work with a family with two children. They are two and four years old. We go to the park, I prepare their food, and I wash their clothes. They love swimming with me they hated the milk and the broccoli soup, but finally they ate it all.

I love taking care of children.
